

Blackpoint Member Admin

Dashboard control for querying, exporting and modifying members.

Features:

- * Querying by group membership
- * Normal searching by name or email
- * Searching by custom Member type properties
- * Export of members to csv-file (from v. 0.3)
- * Bulk deletes on selected members
- * Bulk re-grouping of selected members

Support native Umbraco member db, and partly Examine and membership providers.
Requires .Net 3.5 / 4.0

Current versions:

0.2 : Stable version

0.3 : Stable version containing csv-file export functionality

Installation

Install the package from the Developer section in the Umbraco backend, as usual. In case the dashboard-control doesn't show up correctly as a tab in the member-section, it's likely due to badly merged dashboard.config file.

To fix it open the /config/dashboard.config file and make sure your content look like this (make sure the new control is added to the existing member-area if you have one in your config file already):

```
<?xml version="1.0" encoding="utf-8"?>
<dashBoard>
  ...
  <section>
    <areas>
      <area>member</area>
    </areas>
    <tab caption="bpMemberAdmin">
      <control>/usercontrols/BP.Umb.Dashboard/MemberAdminUserControl.ascx</contro
1>
    </tab>
    ...
  </section>
  ...
</dashBoard>
```

Configuration

The control has a few options in its `/config/bpMemberAdmin.config` file:

```
<SearchProvider Type="UmbracoNative"/>
```

where `Type` can be `"Membership"`, `"Examine"`, `"UmbracoNative"`

```
<DataGridPaging EnablePaging="true" PageSize="250"/>
```

where `EnablePaging` can be `"true"` or `"false"` and `PageSize` any integer > 0 .

NOTE

This component has options to modify (e.g. delete and change) members and member properties, so as always - use it at your own risk.

The component is still in Beta, so give me a shout if you experience any issues - or if you have any recommendations or requests for improvements.

Source code is available - just haven't packed it up yet, so contact me if you are interested via blackpoint.dk or twitter [@tommypoulsen](https://twitter.com/tommypoulsen)
