

Delete Workflow for Umbraco Contour

This very simple Contour workflow deletes the current record from the database

Compatible *only* with Umbraco Contour 3.0.15+

How does it look?

It's a standard Contour workflow - nothing too fancy to expect visually:

How to install and use?

Just drop the compiled assembly into /bin and you're set.

Save to use ONLY when the form has been approved, not in submit state!

When the form has been Approved

Delete record when Approved ✖ ✎

[+ Add Workflow](#)

Success!

Download: Ready to use as an Umbraco Package

You can [download](#) Value Duplicator as a ready to use Umbraco package and plug it into your site easily. The package installer only adds a dashboard item to the "Settings" section, so the risk of wrecking your CMS installation extremely low.
